SUMMARY

Full Stack Web Developer and experienced IT leader. Known for creative problem solving, ability to rapidly learn new applications and technologies, with strong leadership skills. Recipient of multiple “Pioneer”, “Pathfinder”, “Count on Me”, and “One Team” awards demonstrating the ability to innovate, collaborate, and provide stellar service to internal and external clients.

EXPERIENCE

Junior Web Developer | FMTC | Remote

October of 2020

- Lead Front-end developer for a critical internal business Web Application development from scratch
- Configure PHP Laravel with Breeze, and Sanctum for Authentication as well as Laravel Mix for Webpack configurations to ensure project assets are built and minified
- Generate project build documentation and onboard new team members to the project
- Define intuitive folder structure and collaborate with the Senior Back End developer to determine logical Web and API routes
- Build the UI for the “from scratch” business application and present progress via weekly demos
- Generate front end Tests using Laravel Dusk
- Improve existing internal and customer facing application UI and UX
- Create wireframes and mockups using Adobe XD to present to cross functional team for review
- Refactor front end code consisting of PHP, HTML, CSS, Bootstrap and Javascript as well as some backend code consisting of PHP Codeigniter framework
- Design and implement a new front end for a complete rebuild of our existing applications using HTML, PHP Laravel Blade Templating, JavaScript, jQuery, Bootstrap, Sass

Quality Assurance | Nucamp Coding Bootcamp | Remote

June of 2020

- Provide Quality Assurance control for HTML, CSS, JavaScript and Bootstrap course curriculum
- Establish a change control workflow using a kanban board to organize all change requests for each curriculum
- Test new node package versions for courses and provide recommendations to improve course material clarity and effectiveness

Web Development Instructor | Nucamp Coding Bootcamp | Remote

May of 2020

- Instructor for Front-end Web development boot camp classes including HTML, CSS, JavaScript, and Bootstrap.

Principal IT Analyst | BAE Systems, Inc. | Remote

2016 - 2020

- Architected and deployed a set of modern Engineering Development Lifecycle tools consisting of Atlassian Crowd, Jira, Bitbucket, and Confluence resulting in an application support cost savings of \$3M
- Managed a cross-sector team consisting of three different sectors and 5 different business areas which resulted in a reduction of ticket redirects, increased awareness of security vulnerabilities, and the ability to rapidly deploy upgrades to standardized applications
- Team Lead of 6 team members and subject matter expert of 7 applications consisting for 3000+ users

Senior IT Analyst | BAE Systems, Inc. | Austin, TX

2012 - 2016

- Led IT initiatives such as server and license consolidation effort leading to \$420K in annual savings.
- Deployed engineering tools that resulted in over \$300K in defect detection hours
- Gathered requirements, planned, tested, executed, and maintained SDLC applications

IT Analyst II | BAE Systems, Inc. | Greenlawn, NY

2009 - 2012

- Provided ClearCase and ClearQuest support for 2000+ Engineers located at geographically dispersed sites

- Deployed applications in closed areas and provided tool training to ensure tool adoption success

Computer Systems Analyst II | BAE Systems, Inc. | Greenlawn, NY

2004 - 2008

- Managed 20+ programs in the Software Engineering department with 150 Software Engineers
- Created Software Development and Configuration Plans for projects exceeding \$400K in sales
- Ensured software processes comply with CMMI level 5 certification and participate in DOD audits
- Developed branching strategies and established software baselines to ensure integrity
